- Fully integrated Record Management Solution for SharePoint both WSS 3.0 and MOSS 2007 working with Amazon Storage freeing your organization's local resources.
- Users can search archived documents from the current site and retrieve documents instantly
- Use a single Amazon account for the whole web application or different account for each site
- Enforce encryption and storage location (Europe or US) on the whole web application level.
- Automatically and/or manually archive and /or backup documents to Amazon Storage.

GT-Archiver is a Records Management System for WSS3.0 and MOSS 2007. GT-Archiver saves the backed up documents on Amazon Storages Services giving you an inexpensive and reliable way to keep your documents for as long as you need them. GT-Archiver integrates naturally with SharePoint, both versions the Windows Services 3.0 and Microsoft Office SharePoint Server 2007.

Users with appropriate privileges to any document library can simply right click and archive or backup any document. Users can set "Tags" that can help in performing search for documents. Users can also select from three different modes of archiving:

- Archive current version and delete the document from SharePoint
- Archive current version and delete all other versions
- Just Archive the current version
